Subject: Submission of Internship Report on “A study on how HRIS can be Improved and made Efficient for the Banking Industry and Sonali Bank”

Dear Sir,

With due respect, I am submitting my Internship Report on the topic titles as “A study on how HRIS can be Improved and made Efficient for the Banking Industry and Sonali Bank” as a part of my BBA program. This is my honor to submit this report of my three months long Internship Program In Sonali Bank in the Human Resource Department at Bashabo Branch. This report has been prepared to fulfill the requirement of my Internship Program at my assigned organization in Sonali Bank. It has been a great learning experience for me to work in the organization and preparing this report by outmost effort. Hence, this has been obvious for me to conduct similar types of studies in the future.

I am thankful to you for your guidance, suggestions, and constructive criticisms during the preparation of this report that only impelled me further into excelling. I genuinely hope that you would enjoy learning about the organization and its operational procedures besides merely evaluating me based on the grading criteria set for this assignment.

Regards
Sincerely Yours,

Maliha Mahjabin
ID: 13204103
Acknowledgement

With due respect, I would like to mention some people who assisted me during the completion of the Internship Program. Therefore, I, wholeheartedly, like to thank all of you.

In this practice, I would like to thank the Almighty Lord for giving me the strength to complete my work sincerely within the specified time. Most importantly, I would like to thank my supervisor Mr. Jubairul Islam Shaown who was always there to guide me and solved my difficulties whenever faced and needed.

Alongside, I would also like to thank Mohammad Sorfe Uddin (Branch Manager) and my line managers who helped me by providing informative instructions and assistance. Without their help, the project would have been difficult to complete.

CBS-Core Banking Solution
ABB-Any Branch Banking
RTGS- Real-time gross settlement systems
Executive Summary

I have discussed the major activities handled by the Human Resource Information System (HRIS) of Sonali bank and that of the whole banking Industry and how it can be improved. The key purpose of this report is to identify overall concept of HRIS in Sonali Bank and the other banks operating in the country, its usage and operations. Sonali Bank has now been using Intellect CBS, I have tried to implement my academic knowledge to understand how the software system has been successfully fulfilling the need of its operations and that how it can be more efficient and productive. Moreover, the use of other Information systems that has been used by the overall banking Industry and its operations leading to better communications and efficiency is also discussed here, leaving the room for more of it.

The world is rapidly changing and as a part of the organization, HRM plays a significant role that deals with the effects of the changing world at work. So to perform the operations successfully, there is no room for doubt that HRIS’s correct implementation and formulation is mandatory. Beside this, HRIS realizes the effectiveness of the HR functions and its orientation has a prolific impact to achieve organizational success. Moreover, HR has been entrusted for ensuring proper employee satisfaction at the organization and also maintain and update the HRIS related claims and information with the operational authority. My recommendation is Sonali Bank should focus more on using new HRIS software covering the whole lifecycle of an employee and handle the internal affairs to save extra time and efforts.

Traditional view of HRIS
In the traditional framework, HRIS is mainly transactional and reactive. The HR managers place job circulars based on the organizational need for additional workers, respond to questions about benefits and payroll, process terminations and resignation. The HR department actions may be fragmented and even rushed in some cases in this reactive role. The basic level of HRIS is used to help to manage employment relationships within the organization and employees. Earlier, companies used to track data on paper and spreadsheets that consumed time and were difficult to manage record. Typical HRIS record employee information, wage and salary, education and training, attendance, performance appraisal etc.

**Modern view of HRIS**

Leading management thinker suggest that, “It is not technology, but the art of human and human management”. That is the continuing challenges for executive in the 21st century. (Drucker, dyson, Handy, saffo, & Senge 1997). Similarly Smith and Kelly 1997 believe that” future economic and strategic advantages will rest with the organization that can most effectively attract, develop and retain a diverse group of the best and brightest human talent in the market place. The effective management of the human resource in the firm to gain a competitive advantage in the market place requires timely and accurate information on the current employees and potential employees in the labor market. With the evaluation of computer technology, meeting this information requirement has been greatly enhanced through the creation of HRIS. (Gupta, 2013). Many companies have realized the need for implementing sophisticated human resource information system. Companies are now able to store till date records that allows them to better prepare for the future growth of the companies. It is designed to make an influence, monitor and control the movement of people throughout their whole working life in the organization. Human resource reduces paperwork because all the information’s are available throughout the system.
1. Overview of the Banking Industry

1.1 The Industry Profile: The Banking Industry

The banking sector of Bangladesh is one of the major sectors, which contributes significantly to the national economy. The sector comprises number of banks in various categories. Considering ownership the sector can be classified into 4 major categories: National Commercial Banks (NCB), specialized banks (SPBs), Private Commercial Banks (PCBs), and Trans-National Banks.

• Bank Alfalah
• ICICI Bank

E) Specialized Development Banks :
1.2 Literature Review

The human resource department of any organization is considered to be highly critical for the entire organization. The many functions of HR serve as a supportive background for the company by providing from knowledgeable, skilled labor to management training services, employee development opportunities and more. But to function optimally, since labor is the single large expense for most organization, human resource departments must have the right tools and resources in place. Human resource Information system is a type of software program that helps human resource employees and managers improve their productivity and the results of their efforts. There has been a rapid change about how employee data used to be stored even at early 2000’s to present Information systems used in an organization. It integrates information like employee details, payroll, benefits, performance evaluation and appraisal etc. It improves ability to reach large candidate pools regarding new position openings, ability to quickly apply higher selection standards to inordinate applications. Saves cost by shifting manual ledgers and books to computer drives. HR Management was later seen as a strategic building performs dealing with the most important resources, which is now called strategic human resource management (SHRM). The human resource Information system brought a total make over to the HR management.
2. Background of the report

2.1 Introduction
BRAC University has given me the opportunity to submit a report on Sonali Bank Ltd. which is the largest state owned bank in Bangladesh. The primary purpose of this report is to give an idea of the HRIS system followed by the bank and how it can be improved.

2.2 Origin of the report
The internship program and the study have following purposes:

a) To experience the real business world;

b) To compare the real scenario with the lessons learnt in Brac University.

c) To fulfill the requirement of BBA Program.

2.3 Objectives of the report
There are two main objectives of the report:

a) Broad Objectives:

- The broad objective of the report is to evaluate and realize the important of human resource information system being used in the bank.

b) Specific Objectives:

To give an overall idea about:

- The HRIS used in Sonali Bank
- Current functions of HRIS
- The performance of current HRIS system of the bank
- Recommendations for improving HRIS of Sonali Bank
2.4 Scope of the report
As I intern in Sonali Bank, I got the opportunity to learn different parts of the banking system. My supervisor has suggested working in the HR division of the bank.

2.5 Capacity of the report
This report covers the management overview of Sonali Bank Ltd. and the organizational structure functions performed by the bank in this report is confined concentrate on the HR practice and HRIS used.

2.6 Methodology of the report
Two sources of data and information has been used widely in order to make this report:

The Primary Source:
- Practical Work Experience
- Information from senior colleagues and Branch Manager

The Secondary Sources:
- Annual Report of SBL
- Various books, articles, compilations regarding the bank
- Different Procedure Manual Published by SBL
- Different Circular sent by head office of SBL and Bangladesh Bank.

2.7 Limitations of the report
I have obtained whatever cooperation from employees of the bank and Sonali Bank Staff College and Bashabo Branch, as much as possible as they were extremely busy. Besides, the total internship duration is not sufficient to give me more than a superficial idea of the functioning of
different departments. I have come up with the following limitations that I faced while pertaining information into the writing of this report:

- The major limitation was the time duration of the Internship. 3 months was not enough to assess the analytical informations.
- Insufficient Information was the main constraint required for the study.
- Sonali Bank is reluctant to give data and necessary informations due to some legal barriers and authentic privacy.
- This report is mainly made using secondary data.
- Insufficient experience for writing such a report may be another cause.
3. Overview of the organization

3.1 Company Profile

Sonali Bank Limited is always ready to ensure the highest quality services. They are maintaining the quality of their services by upgrading banking technology and applying high quality business ethics through its established commitment and heritage. The main objectives of Sonali Bank Ltd are to maximize profit through optimum utilization of resources and they also provide various sorts of facilities to its customer. For instance, credit facility. SBL grants credit to the following heads.

a) **General Advance:**
- Loan General
- Staff loan Car
- SOD General
- Cash Credit (Pledge)
- Cash Credit (HYPO)
- Small Business Scheme
- House Building (Residential)
- Festival Loan
- House Repairing and Renovation
b) **Foreign Advance:**
- Packing Credit
- Security over Draft (SOD)
- Payment against Document (PAD)
- Loan against Trust Receipt (L.T.R)
- Loan against FDR
- Foreign Dollar bill purchase (FDBP)

Customer of the bank fulfils their needs through such kind of credit facility. These loans service has been making huge profit for the Bank. However, the recovery rate is not up to the mark and SBL is trying to recover it. If the administration of this bank successfully enhances the recovery rate of this scheme then it can easily be the highly profitable sector for it. For Bangladeshi economy foreign remittance is an important influential economic factor and it has an excellent impact in our national economy more specifically in our GDP (Gross domestic production). Bangladeshi workers and the migrant who stays in various parts of the word are source of significant inflows of foreign currencies. Many developed nation’s faced economic crisis over years. However, Bangladesh is still continuing its stable GDP growth and the economy is in a decent situation. The huge remittance inflow in Bangladesh helps to keep the economy stable. SBL turned into one of the biggest and crucial players of Bangladesh into remittance sector and currently they are dealing with more than 15 foreign banks and Money Transfer Organizations. By the help of them remitter can send money in possible fastest time.

3.2 **Background and History of Sonali Bank**

Sonali Bank was established under Bangladesh Bank (Nationalization) Order 1972 (presidency Order No.26 of 1972) and the largest commercial bank in the country. By taking over branches of former National Bank of Pakistan, Premier Bank Ltd and Bank of Bahawalpur Ltd a pair private banks performing class banking over the century in that period. National bank of Pakistan was government reinforced bank which was founded to finance the jute industry in East Pakistan in the early period of
Pakistan. 16th December 1971, after the birth of Bangladesh newly established Sonali Bank got special facilities from the government to perform on account of Bangladesh Bank in those places where Bangladesh Bank is not available. Within a few years, with the improve of overall performance, SBL becomes the largest and most significant commercial bank of Bangladesh with 1204 branches and approximate 21,839 up to now. By the Nationalization Order 1972 (Presidential Order-26), SBL become the largest and leading Nationalized Commercial Bank.

As a completely state owned or operated organization, the bank had been performing its nation-building responsibilities by commencing government commissioned various socio-economic Programs as well as money market exercise of its personal volition, covering all spheres of the economic condition. From 15th November 2007, the bank had been worked as a public limited company with 100% ownership of the government. After corporatization, the administration of bank has been granted required autonomy to make the bank competitive and to operate its business proficiently. SBL is governed by Panel of Directors containing of eleven members. The Bank is headed by the Chief Executive Officer & Managing Director. The corporate headquarter of the bank is situated at Motijheel, Dhaka, Bangladesh which is the main commercial center of the capital.

4. Human Resource Information System of Sonali Bank

Sonali Bank Limited has completely computerized Human Resource Information System (HRIS). All records of an employee from their start to end is stored in Bank information system. They also maintain every employee personal file for manual backup and the software they use that’s name is Orbit. Human Resource Department of SBL uses one portion of Orbits software. Every personnel get the opportunity to access their own account and they can see their own recorded information from the database. Human Resource Department of SBL can enter new data, customize prior data and also can enquire about past data. However, they are not able to delete any data from the database. So data input is crucial part of this system. In case any incorrect data is entered then the employee has to explain why this mistake is happened and immediately they have to contact with the IT Department of SBL. The process of using Orbit and maintain record by the Human Resource Department is given bellow:

 Vlad Log on to Orbits

➢ To start the application the user has to double-click on icon of HRD on user computer
➢ Then instantly a login form comes where you have to write username, password and database name to connect.
➢ After verifying the user name and password enter to the database
➢ Database window as follows:
After double-clicking the HR Management icon the application appears second login form, requires different user name and password
Then it enters into main menu.

**Main Menu**
Main Menu is used to start new form, updated forms and destination table entry form of individual official
User can enquiries, take help, make report and learn about software from menu module
After login, main form shows up with numerous button and menu module

4.1 List of most popular HR Software Companies:

ORACLE  CRITERION  CORE  EPICOR  ASCENTIS

INFOR  WORKDAY  KRONOS  CERIDIAN  SAP
4.2 Intellect CBS (Core Banking Solution)

Recently Sonali Bank Limited has made a partnership with Bangladesh Commerce Bank and Polaris Financial Technology to form a joint venture company and they have signed a deal with two firms to give a facelift to its banking system and replace its present branch banking solutions. The main aim of this partnership is the installation, implementation and maintenance of a centralized online real time banking system which is called Intellect Core Banking Solution (CBS). SBL has selected Polaris as a partner because of supplying, implementing and supporting the ORTB system replacing the existing branch banking solution. The largest state-owned bank of Bangladesh marks a key landmark in the journey of the bank's perspective by providing competitive services focused on enhancing functionality and customer experience. Polaris Bangladesh is providing superior core banking functionality and user experience. The implementation of this technology enables the SBL to move towards next generation banking technology and will also offer them with a competitive service edge and faster go-to-market. CBS is specially designed for Bangladeshi Bank which straddles the overall range of banking procedure, including operational accounts, general ledger, deposits, loans, basic core modules and advances. Already 1200 branches have implemented this technology and Sonali Bank Limited is serving their customer the modern public sector banking across Bangladesh.
4.3 Language
Front End & Back End

Orbit software has been designed and personalized by ERA-InfoTech Ltd. It is a joint venture IT organization set by RANKS-ITT, ETA-InfoTech of Dubai and Sonali Bank Limited. A huge number of system and business expert and developers are devoted towards development and personalization of the application and after sales service. The ongoing updating of technology, programming and management skill has arranged by the ERA-InfoTech. SBL is experiencing technical support ETA-InfoTech, UAE. Orbit is designed by two coding languages and the front end was designed by ETA-InfoTech which is a multi-paradigm, object-oriented programming language. The back end of Orbit was developed by RANKS-ITT.

4.4 Functions of Intellect CBS
Core Banking is a term given to a centralized system wherein all banking functions. The implementation of this technology enables the SBL to move towards next generation banking technology and will also offer them with a competitive service edge and faster go-to-market. The main functions of intellect CBS are given below:

- Opening new accounts and Customer on-boarding
- Managing deposit and withdrawals
- Transactions management from initiation to reporting
- Interest calculation and management
- Payment Processing (Cheques, cash, NEFT etc)
- Loans disbursement and management
- Processing cash deposit and withdrawals
- Processing payment and cheques
- Processing and servicing loans
- Accounts Management
- Customer Relationship Management (CRM) activities
- Setting criteria for minimum balance, interest rate, withdrawals allowed limit and so on
4.5 Reason for Choosing Intellect CBS

• Customer Centricity:

The Intellect CBS offers a Relationship Common Front End (RCFE) which allows bank customer to obtain a 360-degree look of the customer. An overall view of all customer holdings, consolidated portfolio, specific queries, overview and all marketing features made by the bank to the customer which are made accessible to users in a single display.

• Product Management:

Intellect CBS has a substantial wizard-like technique towards controlling banks’ services and all services can be developed on the fly by the bank thereby speeding up the time-to-market. The service wizard comes with a collection of controls which allows the bank to explain permutations of services.
• **Workflow Management:**

Intellect CBS comes with a built in transaction workflow framework. This is used to customize business and decision processes and this framework can also be used to extend financial transaction conduct by developing custom circumstances that can be invoked as part of a transaction.

**Comparison between the two HRIS Software**

4.6 **Benefits of using HRIS**

**Reduce Paperwork**

Approximately $8 billion are spent by the companies every single year to manage paper. Employees print documents and throw away it. Sometimes they spend countless hours trying to find it again. HRIS software reduces this wastage of paper and helping employees to find out information very easily and rapidly. HRIS software also can make sure governmental compliance, enhance management oversight, encourage superior customer service, and eventually enhancer bottom line.
**Improve Oversight**

Forget hiring, training, and reviewing staff the old school method. Executives and business owners will save multitudinous hours by counting on an HRIS for managing the applying and interview method, setting goals for new staff. The system will even be designed to stall the hiring, coaching or termination method if the work isn't properly completed and submitted. A well-designed HRIS will proactively monitor compliance with routine company policy whereas requiring higher management to deal solely with cases requiring their personal attention. The system also will generate reports to demonstrate compliance, establish irregularities, and pinpoint issues that require manager intervention.

**Enhance Customer Service**

Customer service is simply pretty much as good as your workers. HRIS is used to implement and manage a strategic on training method that provides new hires each advantage to succeed in their potential. Productive, engaged workers can supply higher service to the customers and contribute to positive image for the company. HRIS may also monitor training activities once that introduces new procedures or instrument so the workers are on the top of their company processes.

**Boost Productivity**

HRIS assists the company to recruit, hire, and train new employees as quickly as possible. So the company can efficiently fill their new position. With significantly better initial on boarding and continuous training can boost staff productivity and decrease turnover as well as acquire better efficiency. And that’s good news for the company.
5. **Analytical Findings**
During these three months of my Internship period I have learned and observed many things. According to that, here are some analytical findings:

- The HR and IT policies are remained same on any circumstances, slow to react on changes.
- The HRIS is continuously needed to be upgraded which most banks do not do since it’s expensive.
- There are not enough trained or skilled employees who can use HRIS of the bank effectively. It’s a government owned bank, most people who’s still working there are working there are old, so not well experienced using HRIS.
- The original HRIS soft wares are very expensive which gives maximum security but most banks do not use their money for buying maximum security rather than they go for replicas.
- The system software is decentralized, this way the risk of losing valuable data is higher.
- The bank does not have separate email ID’s for each employees using HRIS which would enhance better communication and avoid errors.

6. **Recommendations:**

- HR Department of SBL should upgrade their policy on account of the circumstances
- They have to keep updating software for ongoing efficiency and quick output from the staff
- The authority should make sure training programs for them who are not comfortable to use HRIS
- Encourage new and old employee to learn new HRIS
- Ensure the maximum security of the HRIS by using original HRIS software
- To provide maximum satisfaction to the staff they have to maintain latest HRIS
- The authority should make sure email ID of all staff for communicating with each other to avoid errors.
- The system software should be centralized
7. Conclusion

The banking sector of Bangladesh is one of the major sectors, which contributes significantly to the national economy. Sonali Bank Limited is always ready to ensure the highest quality services. They are maintaining the quality of their services by upgrading banking technology and applying high quality business ethics through its established commitment and heritage. To carry out and control the banking activities, interact with their customers and suppliers business firms and other organizations depend on information systems. HRIS is a software solution for the data entry, data tracking, and data information needs of the Human Resources, payroll, management, and accounting activities within a business. This software has made the banking activities easy and fast. It is also reducing the expenditure of the company by recruiting fewer employees. The linkage of its financial and human resource modules through one database makes this software both rigid and flexible. SBL has created a landmark for the banking industry of Bangladesh. Private and public banks of our country should follow their footsteps to make their banking experience more reliable and enjoyable. They have successfully developed, integrated & been using ORBITS to perform HR activities though the bank should widen its usages for getting best of it.
