Subject: Submission of Internship Report.

Dear Sir,

This is a great pleasure for me to submit the internship report, which is a partial requirement for completing the degree of BBA Program curriculum. It is a great achievement to work under your active supervision. I would like to take this opportunity to thank you for the guidance and support which you have provided me during my internship period.

My organization is Kabeer Consulting Bangladesh Limited and I have prepared my internship report on “Introducing, Benefits & Challenges of SAP BUSINESS ONE Solution for Small & Mid-Sized business ventures in Bangladesh by Kabeer Consulting Inc.”. The analysis in the report is based on the data and information found during my internship period. There are few limitations due to lack of time and other reasons, but I have tried my level best to make it as correct as possible and I have tried my best to gather related information from all available sources.

Yours sincerely,

Md. Abu Nayeem Chowdhury

ACKNOWLEDGEMENT

I would like to express my deep gratitude to all those who have been helpful in the preparation of this internship report. It certainly would not have been possible without the help of many people and I would like to acknowledge my pleasure to all those who had helped me during this entire process.

At the very beginning I would like to express my deepest gratitude to Almighty Allah for giving me the strength and the composure to finish the task. Internship report is an essential part of the BBA program and to complete the process that I have got opportunity to work in world renowned consulting firm on SAP & ERP’s local office Kabeer Consulting Bangladesh Limited, 70, Green Road, Fattah Plaza (8th & 9th Level), Dhaka, Bangladesh.

It is a great pleasure to prepare internship report on “Introducing, Benefits & Challenges of SAP BUSINESS ONE Solution for Small & Mid-Sized business ventures in Bangladesh by Kabeer Consulting Inc.”. On this manner I would like to express my deepest gratitude to my honorable academic supervisor, Mr. Feihan Ahsan, Lecturer, BRAC Business School, BRAC University for permitted and guiding me to prepare the report.

I want to thank my organizational supervisor Ms. Rezwana Khan, Director & COO of Kabeer Consulting Bangladesh Limited; for permitting me to work at there. Moreover, I would like to express my thanks to Marketing & Operation division of Kabeer Consulting Bangladesh Limited for providing valuable information, especially, Mr. Reefat Siddiqui, Assistant Manager, Sales & Marketing and Ms. Sarmin Akter, Sr. System Analyst.

In addition, I would like to thank all of the employees and responsible persons of Kabeer Consulting Bangladesh Limited for providing me necessary support whenever I required. Without their contribution, it would not have been possible for me to conduct this project work. Lastly, I am also thankful to my family members, all my classmates, well-wishers as well.
EXECUTIVE SUMMARY

Enterprise Resource Planning (ERP) system has been one of the most popular business management information systems, providing benefits of real-time capabilities and seamless communication for business in large/medium/small sized organizations. For the Bangladesh market SAP Business One ERP solution is very suitable on the basis of cost, implementation, workability, efficiency, profitability as well as a solid road map for organizational growth.

This report is particularly focused on the introducing SAP Business One ERP solution and its overall benefits as well as the challenges for the Bangladeshi market. Many companies have already implemented SAP Business One but few of them are running successful due to choose SAP consultant carefully. Kabeer Consulting Inc. is one of the rewound U.S. based ERP Consultant and they operating their business in Bangladesh with the association of country’s leading ICT solution provider named Star Computer Systems Limited (SCSL), as Kabeer Consulting Bangladesh Limited.

Kabeer Consulting Bangladesh Limited has experienced and dynamic SAP and ERP consultant with the vision to implement successfully SAP Business One for Bangladeshi ventures as maximum ventures is not capable to take SAP R/3 (for large corporation). In a word, SAP Business One is the most suitable and future proof ERP solution for Bangladeshi companies. Here, I tried to discuss this facts on it and made some findings to resolve.

CHAPTER: 1

BACKGROUND OF THE REPORT
1. Background of the Report

During my internship at **Kabeer Consulting Bangladesh Limited**, I got the opportunity to know about world renowned ERP Software, entitled, **SAP**. Besides, Kabeer Consulting Bangladesh Limited is the joint venture of country’s leading ICT Solution **Star Computer Systems Limited (SCSL)** and US based well known ERP solution provider & consulting firm, named **Kabeer Consulting Inc**.

I heard that Kabeer Consulting BD brought SAP Software system including implementation and consultation in Bangladesh premises. I came to know in MIS371 (Management Information System) course that SAP is the leader of the ERP industry in the world, where 70% of first-world economy is depends on SAP completely. Few Bangladeshi large companies have already implement SAP and few are on implementation stages. Kabeer Consulting BD have already implement SAP Business One Product in some local and multinational companies located in Bangladesh premises.

For the Bangladeshi market the SAP Business One is the most suitable, affordable, flexible development and fully future proof software system that would allow the companies to provide better services, defend the position, analyze the competitors and provide other benefits. Besides, the implementation of SAP software is quite interesting and it does not take place often. That is why, I thought that it would be quite interesting if I did a report on “Introducing, Benefits & Challenges of SAP BUSINESS ONE Solution for Small & Mid-Sized business ventures in Bangladesh by Kabeer Consulting Inc.” and would give me an insight. This report is an essential part of my internship and I have tried my best to gather all the direct and indirect data in order to deliver a comprehensive overview. I have put my level best efforts to be able to focus strongly on this topic so that the introduction, benefits & challenges of SAP Business One Solution for Small & Mid-Sized business ventures in Bangladesh could be clear to us. I am thankful to my academic supervisor for permitting me the work on this topic.
1.1 Objectives of the Report

The report has comprehensive and specific objectives to follow.

Main Objective:

The comprehensive objective of the report is to find and describe the Introducing, Benefits & Challenges of SAP BUSINESS ONE Solution for Small & Mid-Sized business ventures in Bangladesh by Kabeer Consulting Inc. Because SAP Business One is the only software system for the solid road map and fully future proof model of ERP industry we want to know about it for our country’s perspective.

Specific Objectives:

Besides the main objective, the internship project has some specific objectives, which are given in the following:

✓ To know about the SAP Business One detailed
✓ To find out the, “why SAP Business One is suitable for Bangladesh market”
✓ To know the benefit & shortcomings of implementing the SAP Business One system in Bangladesh.

1.2 Scope of the Report

This report is solely made for the academic reason and to satisfy the necessity for the internship. This report has secured the immediate and backhanded parts of SAP Business One software framework, including the introduction to the Bangladeshi market, advantages, and shortcomings. Moreover, the report is focused only on SAP Business One implementation by Kabeer Consulting Bangladesh Limited for the Bangladeshi ventures.
1.3 Methodology

For this report, information has been assembled from both primary and secondary sources.

**Primary Sources:**

For primary data, several face-to-face interviews have been conducted with officials from different departments. Information provided by them has been very important for this report.

1. Mr. Dilip Sadh, President, Kabeer Consulting Inc.
2. Mr. LD Sharma, Vice President, Kabeer Consulting Inc.
3. Ms. Rezwana Khan, Director & COO, Kabir Consulting Bangladesh Limited
4. Ms. Aamrita Chouhan, SAP Functional Consultant, Kabeer InfoTech (India) PVT. Ltd.
5. Mr. Sam Sing, Sr. Manager, Marketing & Sales, Kabeer InfoTech (India) PVT. Ltd.
8. Mr. Faruk Hossain, SAP System Engineer, Kabeer Consulting Bangladesh Limited

**Secondary Sources:**

To comprehend SAP Business One software framework, the information has been gathered from the web and distinctive articles, and their sources have been given in the references part.
1.5 Limitations of the Report

While collecting data, analyzing and representing them I have confronted a few constraints. In any case, notwithstanding the confinements, I have made a decent attempt to set up an extensive and rather intriguing report. The general constraints of the report are specified below:

- Some statistical and qualitative data that were needed to give in the report but I couldn’t able to attached due to lace to time constrain.
- I had difficulties in meeting and gathering information from the operational team, whom were very important to collect data regarding SAP Business One.
- As I was not an intern for all departments, I could not able to take interview with the other people of Kabeer Consulting Bangladesh Limited except Operation team and Business Development team.
- Because of organizational confidentiality, I could not disclose much information in this report.

- Delivered 60+ releases on time, across platforms, technologies and engagement models.
2.3 Organogram for Kabeer Consulting Bangladesh Ltd.
2.4 Products/service Offerings

Introduction to Software Principal Company – SAP

SAP’s unique ecosystem spans 140,000 installations in more than 120 countries and in 37 languages. And with 185,000 certified partner employees, 77 trainings centers, 7 global support centers, 10 custom development centers, and genuine 24/7 support, SAP truly makes a difference in helping our customers to optimize their organizational and IT performance and drive their business and IT success.

With subsidiaries in more than 50 countries, the company is listed on several exchanges, including the NYSE under the symbol “SAP.”

SAP's Strategy for Growth

SAP growth strategy seeks to strengthen SAP’s market leadership. The convergence of market trends in mobility, Big Data, cloud computing, and social networking presents significant opportunity for SAP to deliver business value through innovation. Compared to 2010, SAP is doubling the addressable market for 2015 by focusing on five market categories:

- **Applications**

  SAP’s customers expect great applications that generate business value for lines of business more than 50 industries. With the SAP Business Suite, SAP is the undisputed market leader in business applications and ERP. SAP continue to innovate and grow these industry-specific and line-of-business focused core applications, while injecting in-memory innovation, improving the end-user experience, and lowering TCO. At the same time, SAP have extended maintenance for the SAP Business Suite to 2020, an extraordinarily longstanding commitment to our customers.
Analytics

As the global market leader in analytics2, SAP continue to augment the portfolio of analytics solutions with the power of in-memory technology. With SAP’s analytics solutions, user can deliver real-time knowledge of the organization, via compelling and interactive visuals, to the right people, at the right time, on any device. Users can collaborate, make decisions with confidence, anticipate what’s ahead and act boldly – balancing risk and opportunity. With SAP HANA, you can exploit opportunities faster than ever before. In addition, with Cloud based solutions, user can speed deployment and lower TCO.

Database and Technology

With market-share growth of 44% year over year, SAP is now the fastest growing RDBMS provider in the market. SAP has created a comprehensive family of databases and database solutions with technology innovations that address the challenges of departmental data marts and large multi-terabyte data warehouses. Organizations of all sizes from any line of business or industry can quickly deploy SAP database and technology solutions in any way they choose, including on-demand, on-premise, and on-device. At the foundation of our technology strategy is SAP HANA, a revolutionary in-memory computing platform for real-time business analysis and reporting.

Mobility

SAP is the global market leader in mobility solutions. SAP continue to drive the unwiring of the enterprise and improve the consumption of enterprise data and applications. SAP’s customers benefit by having the freedom to operate anytime, anywhere, on any device with mobile apps that ease access to enterprise processes and information. IT units and partners can create new or mobilize existing apps with the Sybase Unwired Platform. SAP continue to help the customers manage mobile devices, and develop and deploy mobile applications to reach their employees and end consumers. SAP delivered 50 mobile apps by the end of 2011 with partners adding several hundred more. SAP will
continue to innovate in this important area of growth.

CHAPTER 03

INTERNSHIP PROJECT EXPERIENCES
3. INTERNSHIP PROJECT EXPERIENCES

3.1 Proposed For Bangladeshi Company: SAP Business One:

System solution we proposed for Bangladesh Short and Mid-Sized Enterprises is SAP Business One (SAP B1) is a fully integrated business solution. Transactions entered into the system immediately update all relevant modules, which creates a real time information system enabling better decision through improved visibility of all transactions and better control of the business. SAP B1 is a powerful, best of breed enterprise wide software application, designed to deliver strong bottom line results for the SMB.

SAP B1 is a comprehensive and versatile business management solution equipped with an easy-to-use interface and serves as the primary enterprise resource planning application. The solution provides all the administrative functions that let you customize and back up data, define currency exchange rates, configure permissions and alerts, and access information from non-SAP software.

SAP B1 is a new generation Supply Chain, ERP and Financial Management and accounting system that delivers enterprise-wide control and integration of all business and financial information essential to strategic decision making and improving the bottom line. Through its rich functionality, powerful online enquiries and versatile reporting ability, SAP B1 provides the ability to interpret accounting and financial information more efficiently than ever before.

SAP B1 has been built using modern leading edge technologies. It incorporates a powerful relational database back-end, to ensure a robust, resilient and highly scalable solution, able to cater for an unlimited number of users. SAP B1 is based on best practice industry standards, and as such can support the major database platforms including Microsoft SQL Server 2000 on the Windows OS Platform.

In the highly competitive field of SMB, SAP B1 has achieved outstanding success to become one of the leading solutions for medium to large organizations. To find out what SAP B1 can do for any SME business – and to learn more about it – visit www.sap.com/smb

Finance

Handles all financial transactions including general ledger, account setup and maintenance, journal entries, foreign currency adjustments, and budgets.

Bank transactions

Takes care of all financial processing such as cash receipts, check writing, deposits, advance payments, credit-card payments, and bank reconciliation.

Controlling

Let’s user define profit centers and distribution rules to distribute the costs to these profit centers. User can also generate profit-and-loss reports for each center.

Sales

Helps user create price quotes, enter customer orders, set up deliveries, update stock balances, and manage all invoices and accounts receivables

Purchasing

Manages and maintains supplier transactions such as issuing purchase orders, updating stock numbers, calculating the value of imported items, handling returns and credits, and processing payments.
Integral customer relationship management

Controls all the information on customers, resellers, and suppliers including profiles, contact summaries, account balances, and sales pipeline analysis

Stock control

Handles stock levels, item management, price lists, special price agreements, transfers between warehouses, and stock transactions

Materials requirements planning

Offers a simple yet powerful planning system that helps production planners or buyers schedule and manage items for production or purchasing based on a variety of criteria

Reporting

Creates powerful reports for nearly every aspect of your business including customer and supplier debt, sales, cash flow, customer contact summaries, bookkeeping, warehouse stock, financial statements, pricing, customer activity, and more (via predefined reports or define-it-queries)

Service-cycle management

Optimizes the potential of the service departments, providing support for service operations, service contract management, service planning, tracking of customer interaction activities, customer service, and management of sales opportunities

Employee profiles

Provides staff management functionality including employee details, contact information, and absence reports
3.3 The deliverables of SAP Business One (SAP B1):

- A fully integrated system with the flexibility to development according to organisational needs.
- Create different templates for different items or item groups
- Make contact details and bank account information dynamic so they update according to changes made in SAP
- Send out dunning letters automatically when a business partner has overdue invoices
- Language-aware templates that change depending on Business Partner language
- Create a UDF on a Contact Person and the layout can be completely customized based on each target contact person or contact group in SAP
- Print and email attached documents
- A stand-alone Crystal Report can be sent out via e-mail on a scheduled basis
- When sending out order confirmation the terms and conditions can be attached to the email
- Send a fax or a text message to the recipient when sending out delivery note
- Send an automated account balance email/fax/text to all business partners who have an outstanding balance on their account

3.4 Benefits of SAP Business One for Bangladeshi ventures:

We all know the SAP is the world’s most tested and running ERP solution that can afford only the giant corporation of the first world. But SAP offers “SAP Business One” version ERP software for Short and Medium-Sized Business, with affordable cost. Thus Bangladeshi companies can use SAP Business One easily. The benefits are listed below.

- Covers all standard business processes
- Totally Robust integration and collaboration
- Improved cost management and defend against the competition
- Faster response times to market changes and operational events – from shifts in demand to supply chain disruptions – and improved global price maintenance
- Flexibility to exploit opportunities for growth through mergers and acquisitions, geographic expansion, or new business models or channels
- Fully integrated standard printing and reporting platform.
- Powerful visualizations and built-in analytics with SAP Crystal Dashboard Design
- Reduced inventory cycle times – with corresponding reductions in inventory levels, sell-offs, write-offs, scrap, loss, or supply disruptions
- Integrated data management from order fulfillment to invoicing and inventory management – resulting in streamlined processes and improved customer experience
- on-shelf availability and forecast accuracy to capture spontaneous customer demand to improve
- Save time by automating repetitive tasks
- Save money by reducing development cost, running costs and maximizing your efficiency
- Affordable and flexible deployment
- No ties to the existing SAP partner – take any customizations
- Fully future proof
- Mobility solution with Android and iOS devices
3.5 Challenges of SAP Business One

In spite of SAP’s significant growth & benefits in the present day, there are a number of challenges that companies may encounter when implementing SAP Business One solution in Bangladesh.

Many expert indicates that SAP implementations have sometimes failed to achieve the organization’s targets and preferred outcomes. Much of the research reported that the failure of ERP implementations was not only caused by the SAP software itself, but rather by a high degree of complexity from the massive changes.

There are few challenges that Bangladeshi companies will suffer, when the will be going to implement SAP Business One solution.

CHAPTER: 4

RECOMMENDATIONS
4. RECOMMENDATIONS

The SAP Business One software implementation at business, especially in Bangladeshi ventures is a significant step. However to get the proper benefits from SAP Business One it will be important that the employees must be well trained, change management should be smooth, etc. So, based on the information I have received few recommendations. To make the organization more efficient, increase market share, streamline on the business and increase profitability; then I hope these recommendations should be implemented.

- SAP Business One software is a tough system to understand and work with. The employees should be given more training, so they could get familiar with the system.
- Generally at the time of SAP implementation, the employees are faced huge workload and can’t concentrate on training. Therefore, employees should be given proper training and only then, they will be able to understand the SAP system and work with it better.
- The trainer must be experienced as well as cooperative and the training module has to be upgrades according to the situation & time needs
- The SAP implementation cost is quite complex, so I strongly recommended that every consulting company should disclose the every hidden cost also, including license cost, annual maintained cost, implementation cost etc.
- As SAP software is almost new in Bangladesh premises, the companies has to be very careful to choose consulting & implementation firm. Because there are so many fraud around here & there.
CHAPTER: 5

CONCLUSION
5. **CONCLUSION**

SAP implementation is a significant and rare steps for any organization. Though the implementation costs of SAP is quite big for the one time, if properly implemented the benefits are huge also. According to the U.S. business type, SAP Business One ERP Software is the suitable for Small and Mid-Sized Company, who’s yearly turnover should be 1 million USD. So in Bangladesh any company who has 7-8 core BDT yearly turnover per year can afford the SAP Business One. Therefore, I personally recommend that every company according to the turnover requirement should have operating their business through SAP Business One ERP software to bring efficiency and profitability.
