Master's in Computer Applications at BRAC University

BRAC University is launching a new academic programme, Master's in Computer Applications (MCA). This programme is designed for students from diverse backgrounds who are looking for a Master's degree in computer applications. This degree will have worldwide acceptance like other BRACU degrees, and the programme will operate like any other graduation programme offered by the university. The objective of this programme is to create graduates capable of facing the challenges of the growing IT industry. The programme is designed in a way that will help students specialise in any of the six major tracks: Software Engineering, Database Management System, Communications, Hardware, Project Management or MIS, Web and E-business. The salient features of this course will allow students from non-IT backgrounds to build career in the IT sector.
