Engineering and Computer Science Career Fair at BRACU

The Office of Career Services & Alumni Relations (OCSAR), BRAC University has organized an “Engineering and Computer Science Career Fair 2015” from 10th June, 2015 to 11th June, 2015 at the university premises. Professor Syed Saad Andaleeb, Ph.D, Vice-Chancellor of BRAC University inaugurated the event as the Chief Guest.

The core objective of the fair is to bring together major employers with graduating students from Engineering and Computer Science. Given the discernible growth in this sector, it is important to establish proper channels of cooperation and connectivity in the interest of fostering opportunities for students. BRAC University intends to connect employers and applicants so that the graduating students can get an idea of tentative job prospects in a range of professional areas. The two-day career event will engage all the key entrepreneurs and captains of industry. The additional programs associated with this event will give the student a chance to explore their strengths and interest to seek a suitable career for themselves. More than fifteen commercial organizations, ICT solutions, NGO and service providers had been participating in this fair.

The inaugural event was followed by seminars and workshops from relevant department and organizations.
