Later on I have been shifted in HR and Administration division where I have worked one month. Somespecific responsibilities and duties of the job are given below.

- **Working in Account opening section:** This is a vital section of general banking where the relationship of banker and customer begins. Here I have performed various workslike:

It is obvious to face such a variety of troubles in any project work. Although I did not face any enormous criticality in my temporary job period however I had to face some little troubles while performing my tasks and responsibilities.

- As far I recall the normal issue I faced in ABL is the transportation issue. When I needed to go there or in the principle branch situated at Motijheel for my work then transportation issue turn into a major issue.
- Another trouble I remember is when any the internee is absent, the work pressure increased and some mismanagement held.
- Generally, ABL is exceptionally strict to keep up their time plan. Some of the time I faced troubles for that I needed to work longer period because of coming late in office.
- Another problem was not working the Air condition of that branch. As we know that recently the temperature was kind of intolerable, I along with all the employees, customers suffered a lot. For this I got sick at that time.

From my experience, my recommendations for ABL are given below:

- Have to focus on their transportation system
• Have to give more focus on the environment of the
• Can make an effective administration group with the goal.

Observing and analyzing the compensation management of an industry because of evident reasons of examination and secrecy, the industry work force ordinarily would prefer not to reveal all statistical information about their association. Though internship program is a practical oriented program, the major difficulties faced during the study are as follows:

At the initial stage, it was a problem to adjust with a new environment such as a corporate environment.

- It was difficult to make information based rich study in a short time period. Like any other research, this is limited to the time constraints.
- The employees in Agrani Bank Limited are so much busy in their responsible fields; they could hardly provide time to discuss.
- Banks often feel reluctance to give the correct information related to this department and their thoughts about the performance of the services.
- The sample distribution may not be even, there may be a majority of people coming from a fixed range of income level.

ABL give rewards to the employees which are basically given for their good performance. It is basically two kinds (a) Intrinsic and (b) Extrinsic.

employee satisfaction is the dimension in which we can measure the amount or ratio of satisfied workers. In a number of studies it is defined that employee satisfaction is an aspect for motivating employees, focuses on their achievements and hold optimistic employee self-esteem in the organization (Alam, Rafat, & Puja, September-October 2012).

Moreover, by ensuring all of these, an organization like ABL can retain huge benefits such as they can get the dynamic employees who maintain the quality of the given work can build and distribute superior value to the customer and they can show their full dedication to the organization. By doing all these, the employees put their faith on the company and consider that organization as their own. Chapter 9

Conclusion
9 Conclusions:

Many new banks have been established in the last few years which have made the banking sector very competitive. So, now the banks need to organize their operation and do their operations according to the need of the market. The main task for banks is to survive in this competitive environment by managing its assets and liabilities in an efficient way.

As an internee intern of Agrani Bank Ltd at Senpara Branch, I have really enjoyed my internship from the side of learning to the side of experience perspective. I am sure that this three month internship program in ABL will help me to acknowledge profession in the occupation market. However during my internee it was very little workable for me to go to the depth of branches' sections thoroughly due to the time restrictions.

Agrani Bank Limited (ABL) is one of the generally extended Banks in Bangladesh. Because of the risk deposit shortage, this Bank may minimize its different types of unnecessary expenditure and they should maximize profit through launching new schemes and obtain different people’s belief.

Finally, it can be said that each association has its positive and also negatives issues. ABL are continuously trying to reach at the pick of progress it seems that in near future their negatives will be eliminated. Forty four (44) years which has started from October 1972 to March 2016 is not a long time of their Bank’s establishment. However they have become one of the reputed private State-owned banks in the country. So it can be expected that ABL will reach the highest level of success very shortly. I wish the Bank all achievement and flourishing in their field.
