Subject: Submission of internship report on “**Adoption of Digital Banking in Bangladesh- A Study on Social Islami Bank PLC**”

Dear Sir,

This is my pleasure to present my internship report on “**Adoption of Digital Banking in Bangladesh- A Study on Social Islami Bank PLC**” as per the BRAC University’s BBA requirement and by following your instruction. I had the privilege of interning at Social Islami Bank PLC, Darussalam Branch, and was appointed to the General Banking Unit. The three-month internship experience was pretty interesting and allowed me to have an enriching educational experience. I was able to get in-depth knowledge about Islamic Banking in general which helped me preparing this report effectively.

Despite my limitations, I have tried my best to finish the report with the essential data and recommended proposition in a significant compact and comprehensive manner as possible.

Sincerely yours,

---

S.M Lutfor Rahman

Ref: SIBL/DSRB/GB/2024/ ৪৯৭

Date: 08/05/2024

**TO WHOM IT MAY CONCERN**

This is to certify that S.M Lutfor Rahman, S/O A.K.M Anisur Rahman & Latifa Khatun, having address- 15/4/2, Road no.1, Kallyanpur, Dhaka- 1207, major in Finance & CIM from BRAC University, started his Internship Program in SIBL Darussalam Road Branch from 20/01/2024 and successfully completed his Internship Program till 20/04/2024. During this period, he has worked in all departments specially in General Banking Division. He has acquired good knowledge in banking in the aforesaid departments. We found his sincere, honest, dedication and performance are highly satisfactory.

We wish all the success in his life.

**Khalil Ullah Ashraf**  
 AVP & Manager  
 01713139441, 01711349530

## **Acknowledgement**

The three-months long internship with Social Islami Bank PLC provided me with very enriching and educational experience from the first day to the ending of my internship period. For this, I am really grateful to the BBS department of BRAC university for providing me with a platform to have my first internship experience. I am also very thankful to the department for providing us with a clear and concise guideline which helped me complete the internship report. I would like to express my utmost gratitude to my supervisor, Riyashad Ahmed, for his guidance and helping me with the report throughout the journey. Lastly, I would like to thank the employees of Social Islami Bank PLC for their kind cooperations and valuable insights, especially my on-site supervisor/manager of the branch, Mr. Khalil Ullah Ashraf, who helped me giving the idea about the report title.

## **Executive Summary**

This report titled “**Adoption of Digital Banking in Bangladesh- A Study on Social Islami Bank PLC**” was done as a requirement of the undergraduate program BBA of BRAC University. This report aims to depict the digital banking scenario, how it has transformed over the years, the adoption and the future of the digital banking in Bangladesh. The overview of Social Islami Bank PLC, its day-to-day activities, its overall financial performance of the last three (3) years, KPI, etc are also discussed in the paper. This report also highlights the Social Islami Bank PLC’s adoption of this dynamic digitalized landscape and its role in doing so. The bank's approach to adopt the newer technology, promoting sustainability through paperless banking, introducing innovative and interoperable apps (SIBL NOW), and commitment to digital inclusion by onboarding unbanked people to formal banking are also discussed.

The report comprises of three parts- First of all, the overview of the report where various internship information and the overall report overview. Second part is all about the organization where I completed my internship programme. This part gives insights about the activities, overall health and financial condition of the organization etc. Lastly, the report/project part emphasizes on the growth of digital financial services, its key drivers for the growth, challenges, and how to address those challenges, by analysing the trends, research papers, and credible sources available.

This study concludes by stressing the significant role digital banking plays in shaping the future of Bangladesh’s banking sector. However, addressing the different challenges, recommendations were also given such as sufficient investment in technology, increasing customer awareness, compliance with changing regulations, and how Bangladesh can cope with this changing landscape.

## **Chapter 1: Introduction**

### **1.1 Internship Overview**

#### **1.1.1 Student Information**

I am S.M Lutfor Rahman, a student of BBA at the BRAC university, currently doing my major on 1) Finance, Banking & Insurance, and 2) Computer Information Management (CIM).

#### **1.1.2 Internship Information**

I had the opportunity to intern at the Social Islami Bank, Darussalam Branch. As per BRAC University's requirement, the internship period was three months long, from 20/01/2024 to 20/04/2024. My on-site supervisor was Mr. Khalil Ullah Ashraf, the AVP as well as the manager of that branch. Although I was initially assigned to the general banking unit, I worked at different desks and units of the bank, helping me gain vast knowledge and experience during my internship.

#### **1.1.3 Duties/Responsibilities**

In the general banking department, my duties or responsibilities included opening accounts, fixed deposits (FDR), and letters of credit (LC), addressing customer inquiries, and data entry. I had the opportunity to work across different desks, which allowed me to learn about the loan department and its operations. Furthermore, SIBL organized a financial literacy campaign that involved a field trip to educate a large audience and answer their questions, in which I participated.

#### **1.1.4 Learnings**

The internship is the foundation or a stepping stone for professional life. This internship opportunity has allowed me to have an in-depth look into the banking sector or the Islamic banking sector to be specific. I observed different banking activities and learned how the employees do their tasks behind the desks, and how they handle and interact with the customers. In addition, I got significant professional guidance from experienced professionals, which, I believe will help me prepare for my future career.

#### **1.1.5 Student Benefits**

The internship program aims to help students learn practical skills in a real working environment. In my case, that is also the truth. I have gained significant insights and practical knowledge from the expert bankers from my respective internship workplace. Moreover, the

network I have built and the guidance I got is unparalleled. Furthermore, the overall internship experience has made me a better version of my former self and enriched my resume.

### **1.1.6 Recommendation**

My whole internship period in the social Islami bank was really pleasant as all the staffs were really cooperative and respectful towards me. Learning experience as well was very productive for me. Few things I would appreciate Social Islami Bank Darussalam Branch might do that will enhance the internship experience far better. Like I said learning experience was great in the Bank but if the bank allows the freshers to observe and teach them the banking activities and relevant terms for the first couple of days, the process of learning and working will be much more efficient and fruitful. One of the challenges I faced during the internship period was the unavailability of information about certain topics for my report. It will be really helpful if the bank has a dedicated information corner for the students for their project.

## **Chapter 2: Overview of the Social Islami Bank PLC**

### **2.1 Background of Social Islami Bank PLC**

Founded in 1995, Social Islami Bank PLC. (SIBL) was founded in 1995 under the shariah principles of Bangladesh and has since established itself as one of the country's leading value-added financial institutions. SIBPLC comprises of a three-tier banking model which are SIBPLC Formal, Non-formal & Voluntary which is the first of its kind, bringing a new dynamism to the banking sector of Bangladesh. SIBL PLC operates under the motto of "Working Together for a Caring Society" (SIBL, 2024). Thus, they work to eradicate the poverty and empower education. The theme of SIBPLC is to build a long-term business partnership with its clients to help them grow profitable.

Currently, SIBPLC serves with 179 branches 236 subbranches, and 4039 employees all over the Bangladesh. Along with that it also has 375 Agent Banking Outlets to provide services to the remote parts of the country.

## 2.2 Organogram of Social Islami Bank PLC

**Figure 1: Organizational Structure of Social Islami Bank**

| <b>Listing Status</b>              | DSE & CSE (Active), Symbol: SIBL            |

## 2.4 Marketing Practices of Social Islami Bank

SIBL has established its brand by offering its innovative products and services into the market. But due to SIBL’s, Shariah based nature it needs very specific marketing strategies. As an Islamic bank SIBL like any other bank uses demographic segmentation for marketing as it targets a very specific audience, where Islamic sentiment plays a huge role.

### 2.4.1 Products & Services of Social Islami Bank

**Figure 2: Products offered by Social Islami Bank**

Social Islami Bank offers its products and services according to the Shariah Law of Banking in Bangladesh.

Other services include various specialized deposit products like Education Saving Scheme, Medical Scheme, Migrant Deposit Scheme, Freelancer Solution scheme, etc.

Other than that Social Islami Bank excels in its marketing by providing social marketing and services. Along with offering traditional banking products and services, Social Islami Bank PLC also works on CSR activities. Such as-

### **2.4.2 Green Banking**

Green banking works with conserving energy, water, saving paper, etc. Bangladesh Bank has acknowledged SIBPLC as one of the leading private banks for its significant role in Green Banking initiatives nationwide. These are not just hollow claims as the bank has spent a large amount in 2023 for establishing solar panels and brick plants that are environment friendly. SIBPLC established its own environmental policies, demonstrating its commitment to the environment. The audit committee and operational employees works under a permanent separate unit named “Green Banking Unit” thus promising the commitment to the society and environment.

### **2.4.3 Cash Waqf Program**

Cash Waqf program introduced by Social Islami Bank PLC, is a one-of-a-kind voluntary deposit scheme that allows clients to do welfare or in Islamic term “Sadakah” with the help of a banking system. This scheme has been well received by both local and foreign clients and is accredited internationally. This shows that Social Islami Bank is committed to do welfare by helping to manage the money sent to the underprivileged and make sure they reach to those who are in need.

## **2.5 Operation Management & MIS Activities**

### **Operation Management**

Operational management refers to operating the business efficiently and effectively by overseeing and controlling the processes of giving services to its clients. The goal is to ensure that an organization runs, meets its objectives, and provides value to customers.

Social Islami Bank’s operational management system in a bank may consist of various tasks and processes that ensure an effective work environment, more efficient management of clients, and better risk management which helps improve customer service and their retention.

The bank recruits operational managers to ensure and oversee the various operational management processes and distribute them among employees.

Operational management of SIBL includes-

- Designing, overseeing, and controlling the daily activities
- Managing customer interactions or maintaining proper CRM

- Handling the transactions and monitoring them
- Implementing technology and advanced infrastructure for more efficient workflow
- Risk management such as mitigating cybersecurity risks, fraud, and other operational risks.
- Monitoring and evaluating the operations as a whole and measuring the performance

To ensure more streamlined and efficient output, various responsibilities are also given to other employees. This promotes accountability and responsibility. These activities help banking operations run smoothly and mitigate the operational disruptions that might occur.

### **Management Information System (MIS)**

Information technology has revolutionized how every business operates. The banking sector's data-driven business model benefits greatly from the emerging management information system. The banking business is all about providing customer satisfaction and better services for its customers. In today's growing number of banking clients, adding MIS into the business is a must.

Social Islami Bank has also implemented an effective management information system that provides better customer service and an efficient customer management system.

The central banking software that SIBL uses is called "Ababil" which manages all the core operations such as opening accounts, data management, transactions, customer information, data tracking, etc., and is able to provide more personalized services.

Social Islami Bank also uses a digitalized TPS system to handle day-to-day transactions, like deposits, withdrawals, loan processing, etc.

The management information system of SIBL also includes digitalized inventory management.

## **2.6 HR Practices of Social Islami Bank PLC**

Human Resources Management and its practices showcase a company's productive, engaged, and motivated workforce, ultimately defining its corporate culture.

SIBL's has a strong HR practice within the company as it includes its employees in the planning, recruiting and training the employees in a planned and organized manner, has a practical compensation policy that benefits and motivates employees and has a proper conflict management policy in case any disputes arise.

### **2.6.1 Recruitment and Selection Process**

SIBL prioritizes the employee recruitment process to ensure the best suitable employee for the company and the position. SIBL follows multiple layers of the recruitment process to ensure the employee fits the post and the company culture perfectly. As a company of banking sector, employee recruitment might be the most vital component of HR planning for the SIBL. The process is lengthy but is essential and integral part of SIBL.

First of all, management looks for vacant positions within the company. Based on the vacancy management then decides whether to find the employees internally or externally to fill out the positions. The HR management then gives a circular explaining the job description and eligibility. After that, the company looks for eligible candidates. From the pool of eligible candidates, the company looks for some specific criteria's like the experience and performance and other attributes as key indicators. Then the shortlisted candidates can seat for the written test, interview and other formalities before selection.

So, the process follows as such-

Job Circular> Employee sources> CV Collection> Evaluation> Written Exam> Interview> Background Check> Confirmation Letter

### **2.6.2 Training of Employee**

The next step comes after employee selection. Training is especially in important for the company to get effective and skilled employees.

In order to make the skilled employees, the primarily selected employees are must have to complete the probationary period for the first 6 months. There they are being trained on different key activities of banks. During this time period their performances are also being evaluated. Here the company finds the lack or shortcomings of the employees. The company then organizes the specialized training for the in-need employees like coaching, imitating or specific skill training etc. Along with that, many seminars, videos, lectures are provided for the employees of SIBL as part of training process.

### **2.6.3 Benefits & Compensation**

The true performance for the employees cannot be achieved if the employees are not motivated enough. This motivation and engaging workforce can be achieved through employee compensation and benefits.

SIBL has implemented various employment benefits and compensation policy for its employees.

- o Festive bonus
- o Profit bonus
- o pension fund
- o Target fulfil bonus
- o Travel Allowances

## 2.7 SWOT analysis of Social Islami Bank PLC

### Strength

- **Strong Corporate Culture:** The bank's board and committee maintain high standards regarding ethics and an amiable environment among all the branches of the bank and regularly monitor its standing and whether the regulations of Bangladesh Bank are followed or not. Thus, by addressing the correct corporate governing practices the s is essential to maintain the strong corporate culture and benefiting the relevant stakeholders.
- **Strong Human Capital:** SIBL has an overall strong human resource and great corporate environment which enables delivering best value to the stakeholders of the organization.
- **Diversified & Dynamic services:** SIBL offers various corporate, daily retail as well as various SME product along with judicious service to its customer.

### Weakness

- **Insufficient investment in Technology:** From my personal experience and from the company's annual report I found that Social Islami Bank PLC has a very backdated technology to operate their everyday activities. The data management software has various limitations. But They are working on Cyber Security but more has to be done in this aspect.

### Opportunities

- **Government Projects:** Nowadays government is taking various projects to develop the country's infrastructure. For example, mega projects like Padma bridge, Expressway, etc. along with some minor projects as well. SIBLPLC might want to take up these challenges by partnering with the projects.
- **Rising Women Customer and Entrepreneurship:** SIBLPLC has various specialized services for women as well as dedicated products for women entrepreneurship which is a great opportunity for the company.
- **Interest in the Islamic Banking sector:** 90% of Bangladesh's total population is Muslim. Islamic sentiments play a vital role in today's growth in the Islamic Banking sector. Being a 'Shariah' bank, Social Islami Bank can utilize the opportunity by capturing this growing market.

### Threats

- **Bad customer:** Some customers intended to take the opportunity for not paying interest/profit after being capable to pay interest/profit duly. Moreover, some customer misuse the loan/investment taken for which it applied showing misleading documents.
- **Effects of pandemic, Global war effects & natural disaster:** Various events like the pandemic period, the global war of Russia-Ukraine, affected poorly for bank loan and investment outflow as well as loan and investment inflow. For FY 2021-22, the GDP growth stood at 7.1% whereas in FY 2022-23, it reduced to 5.78% in FY 2021-2022. (According to the provisional estimates of BBS)
- **Unanticipated event:** Nowadays hacker or cyber criminals are seeking to hack through Sophisticated IT tools and technology. Due to frequent cyber-crime, customers' trust could be weakened in banking security.

## 2.8 Financial Performance of Social Islami Bank PLC

Financial analysis of an organization refers to the process of evaluating a company's overall financial health by analyzing the different key performing indicators (KPI), audited financial

statements different ratios like profitability ratios, liquidity ratios, etc to determine whether the organization is operating efficiently or not. It helps stakeholders to assess the company's performance and benefits the stakeholders to make supervised decisions and develop strategies for improvement in the future.

Social Islami Bank PLC has seen overall positive growth over the last few years despite having some drawbacks. The KPI suggests that the bank has been doing relatively well with the other competition in the market.

Key performance indicators of SIBPLC at a glance:

*Figure 3: KPI of Social Islami Bank PLC*

## 2.8.1 KPI Analysis

Looking into other components of financial performance indicators we can dive further.

### 2.8.1.1 Operating Profit

The Operating profit indicates how a business is faring on its core operations meaning, whether the company expenses are in limits with its income. It indicates the efficiency of the management and operations. Over the last 3 years, SIBPLC has been doing fairly well within the organization as profit increases yearly.

**Figure 4: Operating Profits of Social Islami Bank PLC**

### 2.8.1.2 Profit After Tax

Profit After tax is also important as it indicates whether the business can continue with the net revenue it generates. It also gives insights to the management to make necessary adjustments to make more profits. Data on profit after tax shows growth over three years and goes as high as 2501.13 million BDT compared to 1659.71 in 2021.

**Figure 5: Profit After Tax of Social Islami Bank PLC**

### 2.8.1.3 Net Assets

Net asset refers to the accumulated total assets after deducting all the liabilities of a company. The graph shows a steep incline over the years on accumulating the net assets indicating healthy wealth accumulation.

**Figure 4 & 5 source: SIBL Annual Report 2023 (Own Constructed)**

**Figure 6: Net Asset of Social Islami Bank PLC**

#### 2.8.1.4 Investment Deposit Ratio

Islamic banks use the Investment Deposit Ratio (IDR) as a metric to help evaluate how much income is being generated by investing from the customers' deposits. It is used by Islamic banks as they invest in different sectors instead of giving direct loans. The higher the IDR, the higher the expected return from the investment. But too much IDR may raise concern as bad investments can make a negative effect on the bank.

**Figure 7: Investment Deposit Ratio of Social Islami Bank**

### 2.8.1.5 Gross Profit Ratio

Gross Profit Ratio refers to how efficiently a company is producing and selling its products. The higher the ratio the more efficient the cost to production ratio is. The graph shows the peak percentage in 2022 at 58.25% compared to 55.86%. But we see a 2.82% decline in 2023 at 56.61%.

**Figure 8: Gross Profit Ratio of Social Islami Bank PLC**

### 2.8.1.6 Return on Equity (ROE)

Return on Equity (ROE) indicates the return/profit on shareholders' equity. The ROE of SIBPLC is fluctuating quite a bit ranging from 8.91% to 11.89% if compared with 2021 and 2023's ROE.

**Figure 9: Return on Equity of Social Islami Bank PLC**

**Figure 8 & 9 source: SIBL Annual Report 2023 (Own Constructed)**

### 2.8.1.7 Return on Asset (ROA)

Return on Asset (ROA) refers to how a company is managing its assets to generate a profit. The higher the better. The graph shows the return on equity is fairly stable over the last two years peaking in 2022 at 0.57%.

**Figure 10: Return on Assets of Social Islami Bank PLC**

### 2.8.1.8 Earnings Per Share/EPS

The EPS or earnings per share refers to how much the company generates profit for each share outstanding. The higher EPS indicates better profitability for the company. The EPS of SIBPLC remains the same for 2021 and 2023 at 1.6 BDT. In 2022, it reached 1.97 BDT per share.

**Figure 11: Earnings per Share of Social Islami Bank PLC**

**Figure 10 & 11 source: SIBL Annual Report 2023 (Own Constructed)**

### 2.8.1.9 The Net Interest Margin (NIM)

The Net Interest Margin (NIM) ratio indicates whether a company is profitable or not in its lending. The higher the value of the ratio the better the more profitable the company is in its lending activities against its assets. We see the lowest percentage of return in 2022 only at 2%. 2021 and 2023 had 2.26% and 2.37% net interest margin respectively.

**Figure 12: Net Interest Margin of Social Islami Bank PLC**

### 2.5.1.10 P/E Ratio

The P/E ratio or price-to-earning compares the market price of a share against earnings per share to determine the potential growth or whether the share is overvalued or undervalued. The P/E ratio of SIBPLC has seen a steep decline in the span of 2021-23. From a good 8.78 to 6.25 to 5.01 respectively over the years which indicates a negative growth rate or a slower growth rate in the future.

**Figure 13: Gross Price-to-Earnings Ratio of Social Islami Bank**

## **Chapter 3: Project Part**

### **3.1 Overview of the Report**

The internship is a short-structured program that is aimed to get practical knowledge about the work field by the means of getting appointed by any form of organization. This allows an intern to learn about the work environment and helps the intern to implement the implications of theories, policies, and strategies they learned during their whole university career. Basically, the internship program serves as the stepping stone for a fresher into the corporate world. A well-organized internship program helps students acquire professional skills and give them a head start at the professional life (Lam & Ching, 2007). However, along with the implications and being a significant part of a learner's practical life, the internship program is also a compulsory part of the academic program of BBA curriculum of BRAC University. Thus, this report titled, **“Adoption of Digital Banking in Bangladesh- A Study on Social Islami Bank PLC”**, was conducted following the guidelines provided by BRAC University.

Digital Banking is a term that encompasses a wide variety of financial and banking services that go beyond conventional banking and even the online banking we know. Digital banking of SIBPLC offers numerous services of digital banking products that are designed to complement traditional banking enabling its clients to have easy and safe access to their bank account. It offers a safe, fast, easy, and client-oriented service that facilitates customers' access to bank accounts and to carry banking services 24x7. The digital banking services allow clients to operate banking transactions at any time regardless of where they are, provided they have access to the internet. This relatively new phenomenon is getting quite popular as times go by. Needless to say, it will be the future of Banking systems in Bangladesh addressing the goal to fulfil the vision of Smart Bangladesh by 2041.

### **3.2 Literature Review**

Digital banking, on a whole, refers to using various digital and advanced technological tools and channels to provide customers numerous arrays of financial services. Digital Banking is term that encompasses a wide variety of economic and banking services that go beyond conventional banking and even online banking. Digital banking mainly works differently than its counterpart, which is traditional banking. It mainly operates online or virtually and without a branch. Digital banking aims to complement traditional banking in a way that adds value like enhancing convenience, efficiency, and accessibility for a bank's customer. It also helps a bank

to manage its customers more effectively as it does not require customers to come physically to the bank and do work manually there. It all happens virtually through electronic or digital means. So, it can be said that banking now-a-days is no longer bound to time and geography (Radovanović, 2009).

Numerous studies about digital banking adoption gained significant attention over the year (Digital Banking: A Scenario of Bangladesh, 2012).

Digital banking allows customers to have complete control over their respective accounts by enabling them to remotely access accounts and manage their transactions like making digital/online transfers and payments, and also helps operate their finances through secure online channels. In addition to that, it also helps to reduce the dependency on physical currency or cash, thus promoting green currency and adding convenience to the customers as well as the banks. Furthermore, it also adds a layer of security as digital banking often uses advanced security features like encryption, multi-factor authentication, and continuous monitoring to protect customer data and prevent unauthorized access.

If we break down the key features of the banks would be-

- Remote and convenient account management,
- 24/7 Service,
- Digital and Secure transactions,
- Cashless/ Green Currency.

### 3.3 Objectives

The main objective of this report is to focus on the digital banking practices in Bangladesh over the years and how these practices/activities are shaping the future of the banking system of Bangladesh and what role does Social Islami Bank PLC plays by adopting the changing digital banking landscape. This report also covers the overview of the bank as well as other aspects of the banking activities of Social Islami Bank PLC.

To be specific -

- To find out what value digital banking adds to the bank or why banks adopt digital banking,

- To analyse the adoption of digital banking by evaluating different trends of digital banking components,
- To find the key drivers that enabled the digital banking growth,
- To see what role SIBL plays in coping with the ever-changing digitalized banking system.

### 3.4 Methodology

The report is comprised of many statistical data from Bangladesh Bank's website data archives, different relevant websites, journals etc. This report aims to give insights about the landscape of digital banking and its adoption in Bangladesh over the years by analysing those statistical data over the period of recent years in Bangladesh.

In order to make the report as informative, reliable, and analytical as possible various sources of data were used. For this report, secondary method takes the spot light as majority of my data were taken from the secondary source.

As mentioned, most of my significant data was collected through secondary sources that were readily available on various different platform. For the **secondary source** I used-

- Website for background research,
- Annual report of SIBL,
- Journal articles about digital banking,
- Bangladesh Banks data about monthly economic trends,
- BBS analysis data,
- Various research papers and study.

### 3.5 Limitations

Although the study was done with the utmost best effort but it was not without limitations. Primarily because of insufficient access to the information. As an intern, I could not access to many information about the bank that I would like to add to the paper. Moreover, some data an information was really hard to gather like relevant data about the users, trends, and different statistics about digital banking. Also, getting the time schedule of some of the official personnel of my internship workplace was difficult too. Thus, because of these limitations some information may be given based on assumptions and done without cross-checking.

## 3.6 Findings & Analysis

### 3.6.1 Evolution of Digital Banking in Bangladesh

If look closely, we can determine that the background or the history of digital banking adoption in Bangladesh is interrelated to the evolution of technology and financial services in the country and sometimes by the hands of certain banks or financial organizations. Though the term digital banking may sound relatively new to the Bangladeshi context, as only 28% of Bangladeshi people are financially literate (The Intermedia Research, 2023) . we can go back in the day, as early as the late 90s when the first example of digitalization of banking was seen. It was the effort of the banks like the Standard Chartered Bank, and DBBL (Dutch Bangla Bank) that introduced Bangladesh to the ATM (Automated teller machine). After the '90s, the introduction of the Internet in the early 2000s the country paved the pathway for the horizon of Internet banking at the hands of Standard Chartered Bank. They were the first to introduce over-the-internet transactions such as online fund transfers, bill payments, balance checks, etc. After that till mid-2010, internet banking further developed, as banks like- BRAC Bank, Eastern Bank Limited (EBL), and City Bank expanded their Internet banking platforms. It is to mention that the most revolutionary inclusion of digital banking happened with the introduction of bKash in 2011, which was brought to us by the BRAC Bank. It is significantly important because it paved the way for the MFS of today and helped literate people to bank, as most people used a mobile phone by the time bKash had launched. Moreover, around the same time as MFS, the introduction to fintech and digital payment systems such as Payment Service Providers (PSPs) and gateways such as SSLCommerz gained popularity, facilitating digital transactions for e-commerce and other online platforms. The government lent a hand to the digital banking sector of Bangladesh by introducing- the Bangladesh Electronic Funds Transfer Network (BEFTN) in 2011 and Real Time Gross Settlement (RTGS) in 2015, making it possible for the banks to make real-time bulk transactions. The last major milestone of the progression of digital banking occurred in 2019 when COVID-19 happened. The amount of overall digital banking transactions increased by 123% in 2021-2022 compared to the previous year (PwC, 2023) . This increment in trends persists and continues to this day.

In addition to that, the regulatory environment of Bangladesh must be given credit as it has proven to be one of the key enablers of the transformation of digital banking. Bangladesh Bank has incorporated and established numerous guidelines and regulations to make digital banking

as credible as it is today by supporting digital banking initiatives. These guidelines ensure the security and transparency of digital banking transactions.

### **3.6.2 How Digital Banking Adds Value to Banks**

Bangladesh is looking forward to having almost 75% of its local transactions digitally by 2027 (TBS, 2023).

There is a reason for the 52 listed banks in Bangladesh to go for digital banking (The Daily Star, 2023) . It not only helps the client to have easier management of their accounts but also helps the bank itself to manage and monetize its clients more effectively and efficiently. For the aim of achieving digital Bangladesh by 2041.

In a nutshell, there are mainly two reasons banks adopt digital financial system. One is that it is cheaper and two banks can manage its work more efficiently with less staffs, ultimately results in cost savings (Digital Banking: A Scenario of Bangladesh, 2012).

First and foremost, the most important part of a bank is to onboard customers with them. The easiest means for a bank to connect with the mass customer can be with just an internet connection with the blessing of digital banking. Through online banking a customer can verify his identity without any hassle and banks can also verify with the integrated database of NID or any other identification channel. Not only that but also a customer can transfer or spend funds remotely through online or any other CRM service, ATMs, CDMs, or MFS agents. These means of transactions can drastically reduce the infrastructural cost, opportunity cost as well as paper or document cost as it uses little to no paper. It also helps a bank to promote their activities as CSR as they can be more committed to green banking. Furthermore, it can a bank can get data-driven analytics of the customer. This will help the bank to provide its clients with more personalized services, thus ensuring the right products reach the right customers. This will help more with customer satisfaction and customer acquisition, hence gaining competitive advantages. This all indicates that the up scalability of a bank ultimately results in revenue growth. Currently, 90% of the transactions that occur in our country are cash-out or check-out transactions. Digital banking will help this money not to be cashed out but only transferred. Thus, money only goes virtually instead of physically.

### **3.6.3 Most Used Digital Banking Services in Bangladesh**

#### **Mobile Financial Services (MFS)**

Mobile Financial Services of MFS are the most commonly used medium of Digital Banking in Bangladesh. Yet the inclusion or introduction of MFS in Bangladesh has been the most important milestone for the digital banking landscape of Bangladesh. MFS enables customers to access their bank accounts and perform financial transactions through a mobile device. As of December 2023, the number of internet users in Bangladesh was almost 132 million and 191 million phone users were listed in the same year (BTRC, 2024) . among them most common MFS providers bKash, Nagad, and Rocket cumulatively have 100 million users (Bangladesh Bank, 2024) . The total amount of transactions through MFS exceeds 280 million USD daily in Bangladesh. No doubt with the growing number of Internet users and relatively financially illiterate people MFS has become the most popular and easy medium of digital banking among those underprivileged communities.

#### **Internet Banking**

As of 2022, more than 4 million users in Bangladesh (Bangladesh Bank, 2024) have been using online banking and the number is growing rapidly because of the boom in smartphone usage. Internet banking has grown substantially as more consumers seek online and mobile access to their bank accounts. The majority of banks in Bangladesh have made online banking platforms for users to utilize the benefits of online banking. They have developed platforms offering real-time fund transfers, bill payments, online shopping services, etc.

#### **National Payment Switch Bangladesh (NPSB)**

The National Payment Switch Bangladesh (NPSB) was introduced in Bangladesh in 2012. Since then, it has been serving as an inter-bank card-based transaction and online retail payments platform that uses ATMs, internet banking, or POS machines. Since its introduction, it has been playing a vital role in promoting e-commerce in Bangladesh. 53 commercial banks that are controlling the card business in Bangladesh, are all interconnected with each other through NPSB, this number was only 19 in the year 2018. This shows the widespread usage of NPSB across Bangladesh.

#### **Real Time Gross Settlement System (RTGS)**

RTGS was introduced in 2015 by Bangladesh Bank to help facilitate high-value bulk transactions in real-time. It introduced a new horizon for banks to do instant transactions that were previously not possible. This especially helps corporate customers businesses or even individuals that require large transactions in an instant. In 2021, according to Bangladesh Bank's financial stability report, 10,810 online branches of the Bangladeshi listed banks, were inter-connected with the BD-RTGS system.

### **BEFTN**

Introduced in 2011, Bangladesh Electronic Funds Transfer Network (BEFTN) is the pioneer of electronic paperless inter-bank funds transfer system. It is an online cheque-clearing system where both credit and debit transactions can be done. Usually, transactions like employees' payroll, remittances, dividends, corporate and govt. Payments, as well as individual payments, can be made through BEFTN. Although mostly, salary, bill payments, benefits, and government payments such as tax, and social safety net payments are done using BEFTN.

### **3.6.4 Advantages of Digital Banking**

**Seamless Service:** The main feature of digital banking is that it ensures 24/7 services for its clients to access from anywhere via multiple channels beyond conventional banking hours. This ensures the cash flow of banks and real-time transactions from any corner of the world.

**Efficiency:** The service that traditional banks can provide individually to a single customer, can be provided to multiple customers at the same time through automation by a digital banking system. This without a doubt will take only a fraction of the time that was previously impossible for conventional banks. Thus, reducing both the customers' and the bank's effort and time. As a result, the banks will be able to make profits by focusing on improving their services.

**Larger Financial Inclusions:** The digital banking system will be able to reach and make a profit from the areas where it was previously thought to be impossible to reach for the banks let alone make a profit. Since establishing branches or sub-branches in remote areas is costly for traditional banks, digital banks can avoid the need to set up physical locations yet they can still generate profit by offering services to people in those areas through digital banking without the expense of maintaining those branches.

**Retained Currency:** One of the main issues many conventional banks face is the shortage of cash as 90% of the transactions that happen in the banks are cash-out transactions. To mitigate this issue digital banking comes in handy. Digital banking allows customers to transfer, and make payments online or remotely. So, on paper, the transaction is happening in real-time but virtually. So, technically banks retain money for the offline operation thus mitigating the insufficient cash issue.

**Different Means Usability:** Digital banking uses various array of services for the customers to choose from like- ATMs, NPSB, BEFTEN, MFS, online payment, etc. This not only adds convenience to the customers but also helps conventional banks because this will minimize the pressure for certain services like withdrawal, client management, and other day-to-day activities.

**Less paperwork:** Customers can open a bank account through a digital banking system without the need for paperwork, which will enable the banks to complete the account opening process much faster than traditional banks. Cashless payment will also enable a bank to reduce paper waste.

**Comprehensive Services:** Various kinds of services will be linked to digital banking apps allowing customers to get a loan through their mobile phone. There will be no necessity to go physically to banks to pay instalments. Customers may just transfer money from account to account. Customers will have complete administrative control over their accounts and claim services as they would like.

**Personalized Services:** Digital banking allows banks to give data-driven analytics which enables banks to give more insights about the customers and their needs. Which ultimately ensures personalized services for the customers, improving customer satisfaction.

**Added Security:** The real-time banking-related update allows both banks and customer to monitor and suspicious or fraudulent activities. Moreover, features such as encryption, multi-factor authentication, and biometric logins enhance the security of customer accounts and transactions.

**Larger Scalability:** Digital banking allows banks to reach a mass audience on a larger scale because of its easy usability. As digital banking allows banks a more cost-effective operation and promotes their products easily, it's easier for a bank to scale up their business.

### **3.6.5 Key Drivers Enabling the Growth of Digital Banking in Bangladesh**

Bangladesh has seen tremendous development in the banking sector since introducing digital banking. One of the main reasons is that Bangladesh has been investing noticeably in developing different digital infrastructures including in the banking sector. Because of the rapid increase in the usage of mobile phones, and internet, Bangladesh have begun adopting digital financial services that has never been seen before.

The most important key drivers that shaped the growth of digital banking in Bangladesh is the accelerating use of smartphones as well as internet access. In 2023, around 90% of all Bangladeshis around 191 million use mobile phones, out of which the majority of the users are smartphone users and almost 132 million uses the internet (BTRC, 2024).

This survey delivers important insights, that is, there is vast potential for the DFS or digital financial services to capture, explore and innovate to make the banks or other financial institution's product to reach out to new customers. Also, Bangladesh, at this moment has a huge surplus in terms younger population that prefers digital products which is a huge potential factor for the future growth of digital banking or digital financial services.

The below depicts the trend of mobile phone and internet users in Bangladesh over the years.

**Figure 14: Number of Mobile Phone & Internet Users**

### 3.6.6 Trends of Digital Banking Adoption in Bangladesh

#### 3.6.6.1 MFS Trend

Bangladesh's digital banking sector is defined by the Mobile Financial Services (MFS). Since its introduction, no other DFS has seen such growth as MFS. As of 2023, according to the Bangladesh Bank's Statistics Department, the combined number of MFS personal accounts with the agent accounts was "220,457,448" which was only "87,431,447" in 2019. MFS has gained so much popularity that MFS providers have made partners with some overseas banks to facilitate and increase cross-border transactions. In addition to that, MFS is now a major remittance provider in Bangladesh. According to Bangladesh Bank, the remittance inflow into Bangladesh was more than 21 million USD in the first six months of 2022. The amount of transaction that occurred in 2023 was 1217375.6 million BDT which is almost 23% higher than the previous year (Monthly Economic Trend, 2023).

<https://www.bb.org.bd/pub/monthly/econtrds/etfeb23.pdf>

This Chart shows the growth of MFS in the last 5 years-

**Figure 15: Amount & Number of MFS Transactions**

### 3.6.6.2 Internet Banking and Mobile Banking Growth Trend

According to Bangladesh Bank’s monthly economic trends for December 2023, the total value of transactions made through internet banking channels was “397221.1” million BDT, which was “224959.7” in FY 21-22, a whopping 76.58% increase in amount. The total number of internet banking users also increased to “7237380” compared to last fiscal year’s “5355586” (Monthly Economic Trend, 2023) .

Below the graph represents the most recent data of internet banking users in Bangladesh according to the monthly economic trend of Bangladesh.

### 3.6.7 Regulatory Frameworks Supporting Digital Banking

Bangladesh Bank's initiative over the recent years marks as an important phase in the adoption of digital banking and overall digital financial services. Bangladesh Bank has realized the vast potential that lies within the digital banking. The central bank has taken a handful of steps to ensure the trend of growth that is happening the industry, the notable among them were

Introduction to the Regulatory Fintech Facilitation Office (RFFO) where there is a proper guideline of how digital banking should run, what regulations DFS must follow, and avoid fraud activities. This also give platform to the new digital banking startups to take initiatives.

Introduction of Bangladesh Bank's Financial Intelligence Unit (BFIU), it has given strict Electric Know Your Customer (e-KYC) guidelines and framework to make digital banking system more credible and help the new of customers to be verified easily and flawlessly.

Introduction of FC clear settlements in RTGS.

The Central bank of Bangladesh has also collaborated with major fintech and introduced the country with digital payments services like Binimoy, EPay and E-Challan.

Introducing National QR Code Standard to help facilitate retail whether small or big, more efficiently. This will help receive digital payments anywhere in Bangladesh.

### 3.6.8 Social Islami Bank & Digital Banking

Social Islami Bank has taken numerous measures to promote digital banking to encourage using the digital banking.

Social Islami Bank is among the first to bring NPSB cards, dual currency cards, specialized prepaid cards like Hajj/Travel Card etc. This specialized dual prepaid card also includes a student card symbolizing their commitment to financial inclusion and digital inclusion to all class of people.

**Differentiated Digital Product:** Services Social Islami Bank also offers numerous digital banking products aimed to promote digital banking and customer convenience. These services include- Online banking, ATM, automated clearing, EFT, SIBL now app which covers all the internet banking services and more, automated trade processing, agent banking, RTGS, etc.

**Dedicated Internet Banking:** The Internet banking app “SIBL NOW” is very user-friendly, the interface, API, usability, and features are on par with the best available in Bangladesh. The strong feature of this app is its interoperability. It can seamlessly transact with any other bank. Using the same technology, you can do NPSB, RTGS, and BEFTN with any other bank.

**Digital Verification and Online Processing:** SIBL also now approves processes for opening and settling letters of credit using digital means. For example, for opening an LC now after the clients submit their applications, all branches of SIBPLC process the necessary documents for opening LCs to the head office digitally. The decision is also made online whether to open the account or not. So, this enhances the uses of online platforms thus reducing the necessity of paper use.

**Online Account Opening:** SIBL also encourages people to open their bank account using the online platform. SIBL follows the e-KYC guideline given by the Bangladesh Bank to promote the digital banking platform and minimize paper uses, promoting green banking.

In addition to that, the bank has also adopted the online process to facilitate foreign trade. SIBL's dual currency prepaid card also facilitates clients of both local and international to purchase across countries. It uses both local and foreign currencies to purchase products from the global market.

Social Islami Bank is determined to bring the unbanked and financially unaware population of Bangladesh into all digital and financial inclusion according to the ICT masterplan of 2041. With SIBLPLC's widespread operation across Bangladesh with 167 mDigital financial; inclusionain branches along with 236 sub-branches, and 375 agent banking outlets, the organization determined to do so. Social Islami Bank has recently introduced three months mandatory training in computer and other banking related components to the probationary officers.

Social Islami Bank addresses that the future of banking in Bangladesh lies in the digitalization of the sector. That's why in this fast-paced changing landscape, SIBL is working on implanting and adopting various digital products that aligns with the Bangladesh Banks ICT project. This includes-

- Edupay Tuition fee collection system for hassle free modernization of transaction system
- Implementing Bangladesh Bank's Niksah EFT system
- Implementing new credit card repayment module
- Dual debit card and foreign transactions through RTGS
- Implementing Bangla QR scanner in every branch
- Implanting more interoperable ecosystem/one-stop service for the digital banking app and internet banking by advance the API integration.
- Implementation of RTGS in agent banking outlets

This indicates that adopting the modern digital products is a top priority and an integral part of the bank's corporate strategy. The digital and technological adoption of Social Islami Bank will gain the bank a competitive advantage, address customer with their needs and help Implement the ICT masterplan of full digital inclusion.

### 3.6.8.1 BEFTN & RTGS Transaction in Social Islami bank over the years:

**Figure 20: Amount of BEFTN and RTGS through Social Islami Bank**

### 3.6.9 Challenges

This wave of transform digital banking in Bangladesh can be challenged by the current technological infrastructure, changing situation of country, and dynamic customer behaviours.

**Cyber Security & Technological Infrastructure:** First of all, the challenge that DFS adoption will face is the lack cyber security countermeasures and able digital infrastructure. Yes, without a doubt, DFS usage at this point is all time high and is expanding more than ever before. But the concern that lies is that, Bangladesh's digital infrastructure able enough or is not there yet. Bangladesh is often vulnerable to different cyber security attacks like phishing, DOS, SQL injection attacks etc. Bangladesh is even prone to ATM machines being tampered and stolen. According to Bangladesh Government's e-Government Computer Incident Response Team, most recent major cyberattacks in Bangladesh occurred Payment Gateway in 2023. In the same year, Railway E-Ticketing Service was also attacked by a hacker group who put on a DoS attack, causing the entire system to collapse.

**Unskilled IT Professionals:** The rapid growth of digital sectors doesn't reflect on the fact that there is a huge pool of skilled IT professionals in Bangladesh. But it is quite the opposite. Because of the lack of technologically literate professional in Bangladesh's banking sectors Bangladesh is lagging behind the and yet to reach its full potential in the DFS. Hence, having not enough cyber-attack countermeasures, not satisfactory services etc.

**Lack of Comprehensive Data Protection Law:** Bangladesh has a lack of comprehensive data protection law to ensure data leakage safety. This includes both personal and financial data. The current Digital Security Act 2018, doesn't do justice to the users as it lacks the necessary guidelines to stop data breaches unauthorised access to the user account. In 2023, a hacker group released an attack on a country's state-owned investment company, and over 100,000 investors' personal and financial data was compromised (BGD e-GOV CRIT, 2023).

**Adapting to Customer Behaviour:** The landscape of digital banking is continuously changing and continues to do so. But the question lies, in whether or not Bangladesh has enough capacity, coordination, and regulation to cope up with it. The customer's needs are consistently changing and digital financial service providers need to recognize those needs for the betterment of their service. According to the Bangladesh's context, the main difficulty the country will face is to maintain regulatory oversight due to the complexity of tracking digital transactions across platforms as Bangladesh lacks the necessary tools or infrastructure to do so.

In addition to these issues, other regulatory compliance, integrating the dynamic legacy system, providing effective customer support and addressing customer needs are the main challenges that digital banking services.

### 3.6.10 Recommendation

Addressing these challenges will require coordination, more investments in different sectors like building suitable digital infrastructure, adaptable regulations and frameworks, and making the population more skilled and trained in technology, adopting international regulatory bodies, etc.

The main weakness Bangladesh has in digital banking is that of cybersecurity threats, which are hindering the lenient development of DFS in Bangladesh. So, the first and foremost duty of the government as well as the bank is to integrate more robust cybersecurity infrastructures.

Of course, implementing advanced cybersecurity requires a great skilled workforce to operate and maintain, which Bangladesh has yet to be able to produce so far. So, this is one area Bangladesh needs to develop.

This leads to a need for robust easily accessible digital infrastructure. There are significant differences between rural and urban areas in terms of access to digital infrastructure like the Internet and even reliable electricity. This, division in digital access seems clearer when we

look at the same survey that was mentioned before. That was done by BBS. 25.6% of urban households have a computer whereas, only 3.1% of households in rural areas do. This shows a big gap between the access to technology in cities compared to the rural side of our country. So digital divide should be reduced as it will be the pillar to create skilled technologically advanced professionals who will contribute to the 1005 digital inclusion policy in Bangladesh, ultimately developing digital financial services too.

Lack of financial literacy is also another cause for digital banking not implementing properly. Only 39% of all Bangladeshis are financially literate. So, most of the people of Bangladesh don't have the basic knowledge about what banking is or how banks work let alone digital banking on a whole. Yes, MFS like bKash, and Rocket are very popular but the true progress of digital financial services won't be notable unless other digital financial services come into the limelight. So, the necessary steps need to be taken to educate about digital banking and banking as a whole by making a campaign, including study material about banking into the curriculum, spreading awareness by pointing out the benefits of banking to the masses people etc.

The lack of seamless transactions is also an issue that needs to be addressed. Bangladesh has a very complex cross-border transaction system. Take handling remittances for example through digital banking. Digital banking services in Bangladesh are often unable to provide seamless global transactions. Cross-border transaction is a critical issue to solve because Bangladesh relies on remittances from the immigrants/diasporas. To solve this, collaboration between the central bank, local banks and international payment gateways is essential.

### **3.6.11 Summary**

This report was conducted to observe the digitalization of Bangladesh's banking sector and its adoption over the years and to find out what were the driving forces or key drivers that enabled this growth. Also, in the report it was also explained the Social Islami Bank Limited's role and effort in adopting this changing digitalized banking landscape of Bangladesh.

The report comprises of the official data of central bank's website, news journals and several study papers on the relevant topic. This report aimed to depict the current and future scenario of the Bangladeshi banking sector and the evolution it faced till this modern period.

For better understanding, verified historical data were collected through online platform and different published articles and graphically presented throughout the report. These graph/charts are own constructed by this report's author and offers the visual representation of the key drivers, the technologies and the mediums that are being adopted.

The report found that the accelerating use of smartphones as well as internet access paved the way to the current digitalized banking system. Furthermore, banks contemporary efforts by adopting the different means of digital banking system like, MFS, internet banking, EFT, RTGS, NPSB etc. and their rapid growth over the years are also shown through graphical representation. The report also highlights the government's role like, contemporary and effective policies, procedures and guidelines and other regulatory frameworks to support the current advancement in the digital revolution of the banking sector. The study found that Social Islami Bank has been a pioneer in the banking industry at adopting the digitalized banking system and leaving a far-reaching effect. The report concludes with the challenges ahead that the means to address them.

### **3.6.12 Conclusion**

In conclusion, it is evident that Bangladesh has entered into a new era of banking and it is growing like we have seen never before. The digital banking landscape in Bangladesh has changed significantly over the years, especially over the last two decades. Transforming from the introduction of ATMs to an almost complete ecosystem consisting of specialized digital banking services like MFS, BEFTN, Internet banking, fintech solutions, etc. has added so much value to traditional banking services. This has made the banking system more efficient, less costly, user-oriented, more reachable, and far more scalable. The key drivers that forced this massive evolution include- the rapid growth of mobile and internet users, agent banking services, mobile banking services, and most importantly the government's direct interference in monitoring, promoting, and securing digital banking in Bangladesh by giving guidelines, subsidies, special benefits, etc. As a result, a huge number of existing conventional banks as well as dedicated digital banks are opting for licensing into Bangladesh's digital financial services. Social Islami Bank PLC is no exception in that regard as it has already added digital inclusion to its name for a considerable amount of time. From promoting paperless banking to including a variety of exclusively digital banking services, Social Islami Bank PLC, has proven its determination to be a role model in the new era of banking that Bangladesh is leaning towards.

But we won't be able to get the full fruitful gist of digital financial services until we address our shortcomings in technology, producing the skilled tech-advanced workforce, threats of cyber-attacks, etc. Additionally, the government aims to achieve full financial inclusion by 2025 and full digital inclusion by 2041. It is high time we work on the challenges we face in the present and take precautions for the futures.
