

Robotics competition held at BRACU

→ Sun Campus Desk

With the slogan “PATHFINDER is intended for those students who are fascinated in robotics, not for the robots”, the Robotics Club of BRAC University organised a robotics competition named PATHFINDER 2 recently.

The objective of the contest is to make the fresh students interested in robotics. More than seven teams participated in this contest. This competitive event has two rounds and every team has to qualify the round one.

Associate Professor of CSE Department of BRAC University and Instructor of Chondrobot, Dr Md. Khalilur Rhaman, examined the robots and offered generous suggestions to participants on how to implement their robots.

He said, “This sort of competition can be the finest to encourage the first year students in robotics. Even student can learn how to build robots easily and quickly.”

He went on to say “Those who work really hard and shows their creativity, they will be able to create more robots for NASA.”

Raisul Kabir, lecturer of CSE department, said: “This time the participants’ number is more than PATHFINDER-1 competition. It means student are becoming enthusiastic in robotics.”

President of Robotics Club, Imran said: “This contest is basically for the fresher’s and to give them the taste of robotics.”
